

Information of Product

Name	Biodegradable PHACT straw (CB0400J)
Characteristic	This product is a drinking straw mainly made from PHA (Polyhydroxyalkanoate), a bio-based and biodegradable plastic material. As an eco-friendly alternative to petroleum-based plastics, it is biodegradable not only under industrial composting conditions but also in controlled soil and marine environments, helping reduce microplastic generation and environmental burden. It also has low concern for hazardous heavy metals or toxic substances and provides sufficient stiffness, durability, and usability for beverage applications.
